The CMR dashboard was developed as a centralized and intelligent platform for efficient document and data management. It enables seamless ingestion of data from multiple sources with effective techniques. Documents are broken down into clause-level segments to improve contextual accuracy and analysis.

PROJECTS

Hygen Hub

- Maha Kumbh AI-powered IoT system for healthcare centers, water dispensers, and air filters
- monitored devices in real-time and triggered automated actions for safety and hygiene.

CMR DASHBOARD

- Provides real-time monitoring of key metrics, helping teams track operations and performance continuously.
- Centralizes data from multiple sources into a single platform, reducing manual tracking and errors.
- Enables faster, data-driven decision-making by giving management instant access to insights.

AutoMart AI – Intelligent Retail System

- An agentic AI supermarket system using LSTM, K-Means, and Apriori for forecasting, segmentation, and recommendations.
- Integrated LangChain and developed a Streamlit dashboard for intelligent, data-driven decision-making.
